Project Proposal: **[CAR RENTAL MANGEMENT]**

Abstract:

Car Rental management system the user has to pass through a login system to get access, then a menu displays with options to add a customer, to calculate the bill for customer, to edit information of the customer, to show details for a particular car model (like no. of times car rented, cash generated from it, and etc.), to add a car in your rental services list, exit program. This type of management system is mainly chosen as we wanted to do something different as compared to last semester.

Group Members:

[Sami-Ur-Rehman (Group Leader)] - [Roll# 22k-4673]

[Ovais Adnan] - [Roll#22k-4677]

[Muhammad Sohaib] - [Roll#22k-4751]
